VISION GOA 2023...

आत्मनिर्भर भारत की ओर

A MEGA
EXHIBITION

04th, 05th, 06th
OCTOBER, 2023

VENUE:
GOA

ACHIEVING GOALS REACHING NEW HEIGHTS...

This exhibition is conceptualized to help Government's endeavor to establish an industry friendly environment in the state by playing the role of a facilitator for holistic industrial development. Besides undertaking the responsibility of the overall development, the state has also taken measures to provide transparent, accountable and responsive administration to remove the bottlenecks and delays for prospective entrepreneurs who can benefit from these policies and programs. The exhibition will not only showcase various innovative developments in the fields of Research & Development, Infrastructure, Education, healthcare, Science and Technology, Information Technology etc., but will also help the entrepreneurs of Rajasthan to unveil their new products and services at a national level and explore linkages with buyers from emerging and untapped markets.

This event will also focus on Atmanirbhar Bharat Abhiyan, Self - reliant India. This will also teach us to improve the standard of living and most importantly improve the trade deficit and the exchequer balance of country. Not only should products be 'made in India', but the promotion of those products should take place so as to make those products competitive. The mind set of India should be 'vocal for local'. We should appreciate our local products, if we don't do this then our products will not get the opportunity to do better and will not get encouraged.

GOA

Goa is a part of Konkan area which is surrounded by hills & forest area. Geographically Goa has mainly three natural divisions namely the Low lands, the Plateaus and the Mountain region.

Low Lands: Low land area is mainly coastal lines. It is about 110 km long. Many beaches are along the coast in this area. Many rivers flow east to east in this area therefore this area land is fertile. This area is thickly populated.

Plateau Lands: The plateau region is found between the mountain region in the east and the lowlands in the west. Plateau land height ranges from 30 meters to 100 meters. In this region mainly plenty of laterite stone is found. It is used for building the houses. Some of the part of plateau land is called headland of Goa. Light houses are built on these headlands. Land in the plateau region is not fertile, few crops are taken in this region.

Mountainous region: Sahyadri Mountains are to the east of South Goa. This part is covered with dense forest. In this area, some of the mountains are very steep. Many streams and rivers flow from this region to low lands. In South Goa, the rivers are Zuari, Talpona, Sal and Galgibag. Inland waterways play an important role in transport of mineral ores from the mining sites in Sanguem to the Mormugao harbour for export. South Goa is rich in natural resources like iron, bauxite and manganese ore. These ores are exported mainly to China, Japan, South Korea and some European countries.

Goa also has a strong presence in fishing, agriculture, tourism, and pharmaceuticals sectors. Mining (iron ore and manganese, exported mainly to China, Japan, South Korea and some European countries), pharmaceuticals, iron and steel industries are present in North Goa while mining and shipbuilding industries are present in South Goa.

GOA

Tourism is the largest segment in the services sector. Goa is traditionally known as a tourist paradise for its natural scenery, beautiful beaches and cultural diversity. In 2021, Goa recorded arrival of 3,308,089 domestic tourists and 22,128 foreign tourists.

Goa currently has a total of 38 operational mining leases with a reported production of 9.84 million tons in 2018-19. The Mormugao port handled 8,242 thousand tons of cargo traffic in FY23 (April-September 2022).

Goa has also emerged as a manufacturing base for several leading companies in areas such as fertilizers, tires and tubes, cement, electrical machinery, fish-net making machines, automatic washing machines, printed circuit boards, pharmaceuticals and pharmaceutical machinery. Cashew processing has also been a traditional industry in the state.

GLIMPSES OF PAST EVENTS

ADVANTAGES

The event "VISION GOA 2023... आत्मनिर्भर भारत की ओर" will focus with the purpose of improving the livelihood of the people and providing security for leading a better life. The main purpose of the exhibition is to bridge the gap between ministries & their allied organization with the people for their welfare. Also, the event will share a spotlight on:

- ◆ Investment opportunities available in the state
- ◆ Ease of business
- ◆ Stable industrial policy
- ◆ Good infrastructure and support system
- ◆ Encouraging rural and local artisans; exhibiting their products
- ◆ Incentive for IT companies.

"उद्यमेन ही सिध्यन्ति, कार्याणि ना मनोरथे:"

That is, success is achieved only with hard work. Nothing happens by just thinking, and there is no shortage of thinkers. If I change the sentiment of this verse slightly in today's context, then I would say that the 'Atmanirbhar Bharat Abhiyan will be successful and India will be empowered only with the help of MSMEs. Although you belong to micro, small and medium enterprises, your role is very crucial for the heights that India is set to attain in the 21st century.

Shri Narendra Modi Ji

Hon'ble Prime Minister of India

ORGANISER

PRAYASS EVENTS AND EXHIBITIONS, a Delhi based company registered with Niti Ayog (DARPAN) & MSME. We are associated closely with various government authorities where we have consistently delivered successful value-added services through events like- Seminars, Conferences, Exhibition and creative effect solutions for digital developments. We work with a vision to create value at all levels that help build a technological infrastructure to combat global competition through business ethics and fair dealing .We work in a conductive culture that delivers the highest standards in the industry- something that the MSME sector is also based on.
