The session aimed to integrate academic learning with a deeper appreciation for nature.</p> <p>Students studied a topic from their regular syllabus—disk management—while being surrounded by the natural environment. To encourage teamwork and interactive learning, they were divided into groups and asked to choose any comfortable spot on the ground where they could sit and discuss.</p> <p>The fresh air and open space created an inspiring learning environment. Students not only focused on their academic topic but also became more mindful of the importance of preserving nature</p>

	<p>and utilizing outdoor spaces for learning.</p> <p>At the end of the session, each group compiled the key points discussed and submitted their work for assessment. The activity successfully combined syllabus-based learning with environmental consciousness, promoting both education and ecological awareness</p>
