

BACHELOR OF SCIENCE (B.Sc.) - ELECTRONICS

PROGRAMME SPECIFIC OUTCOMES (PSO's)

PROGRAMME SPECIFIC OUTCOMES	
PSO1	Understand concepts and principles in analog, digital, communication and power electronics.
PSO2	Apply theoretical knowledge to practical situations, including laboratory experiments and projects.
PSO3	Analyze and evaluate electronic circuits, communication systems and instrumentation to identify strengths and weaknesses for repair and maintenance of electronic systems.
PSO4	Design and program electronics circuits using different software and microcontrollers.
